# Acknowledge

The success and accomplishment of this project requires tons of hard work from all the team members under dedicated guidance and assistance from a number teachers and staffs from FPT Aptech Computer Education.

We would like to send our thanks to the FPT Aptech Computer school for designing this practical project course so as that we are able to gain practical skills and experience of team-work, problem defining and solving, project handling and many more which would turn out to be a great asset and would help us to be more competitive candidates in the IT labour market.

We are thankful to have our families stand behind us to encourage and support us to pursue our dreams as well as having those friends and classmates who have shared their knowledge and experience with us, contributing to our success of building our first awesome back-end application.

As a team leader, I would like to thank my two team mates, Mr. Huan and Mr. Phuc, for their patience, hard-working, assistance and collaboration throughout the project course.

Last but not least, we would like to thank Mr. Le Thanh Nhan, our dedicated class head teacher, who helps us to obtain the foundation of programming knowledge and to successfully accomplish this challenging back-end project.

On behalf of all team members in Group 2, Sem 2 Class T1.2010.E0,

Yours Sincerely,

Nguyen Huynh Quang Vinh.

# Synopsis

This project is considered a simulated website that we could use for our ambitious plan of our future career path after our graduation.

In recent years, freelance jobs have become a phenomenon because of its superior features and flexibility as well as the gradual change of working formalities with the support of modern technology and the impact of COVID pandemic. This phenomenon grows dramatically in some particular fields such as software engineering, big data, AI and graphical design, attracting a huge amount of workforce to the job market. As a result, more and more people choose to pursue those promising sectors in college and universities while many other people who are currently under employment, would like to take shorter courses at a night education centre as a supplement for their current skills and knowledge.

Observing those changes and the strong demand of night courses in these fields, we would like to establish an education centre that could help us to start up our own business related to software engineering as well as helping people to achieve their dreams. First thing first, we would like to build up a web application through this Semester 2 Project for which we use the back-end languages and frameworks (PHP and Laravel) that we have been taught in school and then combine with React for the front-end development to create a high performing single page application.

The web application has two main features:

- To control contents published on the interactive UI.
- To manage the information of classes, students and teachers.

# **Review 01**

<b>Design Plan:</b> PP4E Website	<b>Document Name:</b> Problem Definition	<b>SWD/Form No.01/PD/Ver 1.0</b>
<b>Effective Date:</b> 23/08/2021	<b>Version 1.0</b>	<b>Page No:</b> 02/ 55

# Problem Definition

As a newly start-up company in a software engineering industry, PP4E (Professional Programming for Everyone) would like to have a beautiful, interactive and robust web application to well represent our knowledge, skills and quality in software, design and data analysis industry.

Besides that, it needs a competent administration system to serve the following purposes:

- Marketing team: to manage and update content of the courses on the front page.
- Sales and Admin team: to manage classes, teachers, students and other tracking reports such as revenues, student's mark, etc.
- Teachers: to manage the Students' List and Mark.

# Customer Requirement Specification

## I. OVERVIEW

➤ Front Page:

- The website obtains essential pages for visitors to find information about courses, teachers and the PP4E education centre.
- The website needs to be written in a trending front-end language as a showcase for our high teaching quality.
- The website should use API to connect to the database as it can be easily interacted with mobile app written and launched in the following year.
- The website needs to have interactive and beautiful data and charts to publish our statistical performance.

➤ Administration Page:

- There are three authorization levels for three different groups of staff: Marketing, Sales and Admin, and Teacher.
- There are basic CRUD functions for courses, classes, students, teachers, etc.
- The data are then assigned and connected with each other to form a particular group of courses, classes, students and teachers.
- There is a search function for each entity.
- There are charts or graphs illustrating the number of sales and students.
- There is export and import function for some areas to have efficient working flow (save time and reduce error).

## II. FUNCTIONAL DESCRIPTION

Supplier	Activity/Function	Input	Process	Output
All Users	- Login	- User email - User password	- Check authentication information on the database - if provided data is matched, then allow to login and see the admin page based on granted right	- notification on success or failure login
All Users	- Update password	- Email address - Current password - New Password	- Validate current information (email and password) - Validate the format of new password - If all matched, then proceed to update the password	- notification on success or failure action
All Users	- Update their information	- Their own personal information	- Validate the input information - If all matched, then proceed to update their information	- notification on success or failure action
Marketing User	- CRUD contents on Front page	- Information for each section/page	- Validate the input information - If all matched, then proceed to update their information	- notification on success or failure action

Sales and Admin User	- CRUD information of Student, Teacher, Class, Courses.	- Relating information required for each group	- Validate the input information - If all matched, then proceed to update their information	- notification on success or failure action
Teacher	- CRUD information of Student's mark	- Student mark	- Validate the input information - If all matched, then proceed to update their information	- notification on success or failure action
Web Master	- CRUD on users' accounts and their access right	- User email - User's access right's group	- Validate the input information - If all matched, then proceed to update their information	- notification on success or failure action

# Screen Shots

## 1. Home page

The screenshot shows the homepage of a website titled "Professional Programming for Everyone". The main heading is "Professional Programming for Everyone" with the subtitle "Learn Professionally". A "Learn More" button is visible. Below the main banner, the text "WELCOME" is followed by "An exemplary learning community". There are three main sections: "Easy As it Gets" (illustrated with books and a lightbulb), "Teach The way you want" (illustrated with a teacher at a desk), and "The small matter" (illustrated with two people interacting online). At the bottom, there are icons for Development, Ecommerce, and Web Design.

## MY SERVICES

---

### Ecommerce

I will design and develop ecommerce online store website.

### Web Design

Qualified web design and attractive effects which catches visitor's Eye.

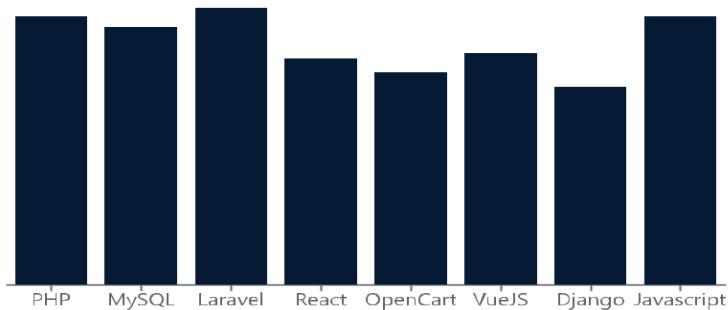

### Web Development

Clean and fresh issue free code to make your website dynamic perfectly.

## TECHNOLOGY USED

---

Hi! I'm Doe Nguyen. I'm a web developer with a serious love for teaching I am a founder of eLe easy Learning and a passionate Web Developer, Programmer & Instructor.

I am working online for the last 7 years and have created several successful websites running on the internet. I try to create a project-based course that helps you to learn professionally and make you fall as a complete developer. my learning exists to help you succeed in life.

## TESTIMONIAL

**Mohammed Ali**

"The instructor was very enthusiastic and knowledgeable about the subject matter. She kept it interesting and brought up good examples. The risk plan analysis and the concept of stakeholders was most helpful."

## 6. About page

### ABOUT ME

---

Hi There, I'm  
**Vinh Doe**  
Work as

### Who I Am

---

Hi! I'm Vinh Doe. I'm a web developer with a serious love for teaching. I am a founder of PP4E and a passionate Web Developer, Programmer & Instructor.

I am working online for the last 7 years and have created several successful websites running on the internet. I try to create a project-based course that helps you to learn professionally and make you feel as a complete developer. easy learning exists to help you succeed in life.

Each course has been hand-tailored to teach a specific skill. I hope you agree! Whether you're trying to learn a new skill from scratch or want to refresh your memory on something you've learned in the past, you've come to the right place.

Education makes the world a better place. Make your world better with new skills.

## 7. Admin page

The screenshot displays the PP4E Admin Dashboard. On the left, a sidebar menu includes: Dashboard, User Profile, Front Page Setup (with sub-options: Information, Service, Our Project, Our Courses, Home Content, Client Review, Footer Content, Chart Content, Contact Message), and School Management. The main content area shows a dashboard with four cards: a top-left card for a total value of \$168,331.09 with a 45% increase this week; a top-right card for \$24,098 with a 45% increase this week; a bottom-left card for \$667,224 with a 45% decrease this week; and a bottom-right card for \$667,224 with a 45% increase this week. Below this is a 'Market Overview' section featuring a line chart comparing the performance of BTC, XRP, ETH, and ZEC over 10 weeks, with BTC showing the highest values. The chart has a Y-axis from 100k to 700k and an X-axis from Week 01 to Week 10. At the bottom, there is a 'Current Statistic' section which is currently empty.

<b>Effective Date:</b> 09/05/2021	<b>Version 1.0</b>	<b>Page No:</b> 43/ 55

The screenshot shows the PP4E Admin Dashboard interface. On the left, a dark sidebar contains navigation links: Dashboard, User Profile, Front Page Setup (expanded to show Information, Service, Our Project, Our Courses, Home Content, Client Review, Footer Content, Chart Content, and Contact Message), and School Management. At the bottom of the sidebar, it says "PP4E Admin Dashboard © 2021 All Rights Reserved" and "Made by PP4E". The main content area is titled "PP4E - Admin Dashboard" and features a header with a logo, a progress bar showing "Complete (11%)", another progress bar showing "Incomplete (23%)", and financial figures "\$81,981.22" and "\$12,432.51". A footer at the bottom of the main area reads "Copyright © Designed & Developed by PP4E 2021". The URL "127.0.0.1:8000/dashboard" is visible at the bottom left, and the page number "2/2" is at the bottom right.
